

Information Sheet for Participants

Assessing Dyspnea using Virtual Care during COVID-19 Pandemic (ADViC2)

WHAT IS THE STUDY ABOUT?

The medical community urgently needs a new way to evaluate patients with shortness of breath over virtual care when in-person physical examinations are not possible.

Our study aims to investigate this new method and see how it may be related to important clinical information like oxygen level in the blood, hospitalization, etc.

For more information, please visit: <http://advicstudy.ca>

TO PARTICIPATE:

1. Please review the attached Informed Consent Form
2. If you wish to participate in the study please self-refer **within 2 hours** of receiving this information sheet.
3. Refer yourself to the study by **TEXTING** your phone number to **(236) 562-2487**. Alternatively, you can also call and leave us a message.
4. Please note that we will not be able to reimburse you on any charges by your phone carrier while participating in our study.
5. Our research assistant will contact you by phone as soon as possible.

For Nurse or Clinician:

Please record the SpO2 level on the line below:

Please record the time that the SpO2 level was taken:

Please record the maximum number the participant can count up to in one breath
(this is optional):

Please feel free to contact us if you have any questions
